SUMMARY

Data and AI professional with 5+ years across banking, insurance and analytics, currently leading AML data assessments at RBC. Builds data validation frameworks, ML-based anomaly detection, and automated pipelines in Python, SQL, PySpark and Dataiku. Combines hands-on engineering with stakeholder leadership to deliver trustworthy, audit-ready data for risk, compliance and AI use cases. Master of Applied Computing (University of Windsor).

TECHNICAL SKILLS

Languages & Querying: Python, SQL (SQL Server, MySQL, Oracle), PySpark, SparkSQL, VBA, JavaScript

Machine Learning & AI: Scikit-learn, TensorFlow, PyTorch, Pandas, NumPy, Matplotlib

Data Engineering: ETL pipelines, API ingestion, Kafka, Hadoop, Hive, Snowflake, MongoDB,

Cloud & DevOps: AWS, Docker, Jenkins, GitHub

Analytics & BI: Tableau, Dataiku, Excel (advanced, VBA)

Collaboration: JIRA, Confluence, Agile/Scrum

EXPERIENCE

RBC (Royal Bank of Canada) — Nov 2025 – Present

Manager, AML Data Assessments — *Toronto, ON*

- Lead end-to-end data assessments of AML data sources (transaction monitoring, KYC and customer data), evaluating completeness, accuracy, timeliness and lineage against regulatory expectations.
- Design and automate data quality controls in Python and SQL, replacing manual checks and cutting assessment turnaround by 55%.
- Apply statistical and ML-based anomaly detection to surface data gaps and unusual patterns feeding AML monitoring models.
- Partner with AML compliance, technology and model risk teams to prioritize remediation of 40 critical data issues and track them to closure.
- Produce assessment reports and dashboards for senior stakeholders and audit, translating technical findings into clear risk ratings and actions.

Outlier.ai — May 2024 – Oct 2025

Data Science & Analytics Consultant — *Remote, Canada*

- Built automated data pipelines ingesting third-party API data into centralized SQL databases with secure, reliable transfer.
- Created a reusable validation and logging layer that recorded schema checks, row-level anomalies and results for audit review.
- Ran User Acceptance Testing with business and IT teams, writing test cases to confirm new features met reporting and compliance requirements.
- Analyzed gaps in reporting processes and recommended automation that reduced manual reviews and improved risk monitoring for the actuarial team.
- Built Excel templates with formulas and VBA macros so non-technical staff could generate accurate performance summaries.

RBC Insurance — Sep 2023 – Apr 2024

Financial Data Analyst (Co-op) — *Mississauga, ON*

- Built Python anomaly detection models for insurance claims data, improving early risk-flagging accuracy by 15%.
- Developed a Dataiku validation framework that automatically checks column names, data types and row integrity for financial and insurance reporting.
- Wrote SQL to merge policy, claims and premium data across systems, enabling deeper analysis of risk exposure and claim trends.
- Published Tableau dashboards of actuarial results for monthly reviews, improving KPI communication across actuarial and finance teams.
- Automated financial statement reconciliation with Excel VBA, reducing manual work and speeding up reporting.

Pumpumpum **Jan 2021 – Aug 2023**

Data Analyst *Gurugram, India*

- Optimized SQL queries across MySQL, SQL Server and Oracle, improving reporting performance by 30% and streamlining ETL.
- Built data lake solutions to land unstructured event-log and survey data, enabling structured transformation and compliance reporting.
- Analyzed time-series and structured datasets with Pandas and NumPy to produce feature-rich internal performance reports.
- Documented KPI definitions, validation logic and pipeline structures in Confluence, speeding up onboarding of new team members.
- Managed Agile sprints in JIRA, helping the team deliver multiple reporting projects on time.

EDUCATION

University of Windsor **Apr 2024**

Master of Applied Computing *Windsor, ON*

- *Relevant coursework:* Machine Learning, Artificial Intelligence, Introduction to Data Science, Image Processing, Database Systems, Web Intelligence

Galgotias University **May 2021**

Bachelor of Technology, Computer Science *Greater Noida, India*

- *Relevant coursework:* Data Science & Big Data Analytics, Data Warehousing & Data Mining, Data Structures & Algorithms, Cloud Computing, Probability & Queuing Theory
